Bow Island

An insurance company recently issued a little card on which is printed the following: "If you buy out of town, and we buy of town, and all our neighbours buy out of town, what in thunder will become of our town?" This question is one which everyone interested in his Home Town should ask himself.

Mr. R.M. Conqueror of Pleasant View paid a visit to Bow Island on Tuesday he reports his wheat of 120 acres is looking fine.

Mr. Hopkins is very busy these days raising up the dust with his Big Four Engine he says this country has got B.C. beaten for rain.

Mr. Hagen has rented Mr. Carlson's Farm north of town, and is busy seeding.

Mr. Bell left for Lethbridge last Saturday, Mr. Blaine has returned to Bow Island and has taken over his store again.

The United Ladies Aid met last Thursday at the home of Mrs. Schuster Sr. about twenty members being present and it was decided to hold a bazaar before Christmas.

A very pleasant afternoon was spent and a nice lunch was served by the hostess.

The next meeting will be held at the home of Mrs. Albert Whitney on May 19th, those wishing to attend the meeting will meet at the Rest Room at 2:30 p.m. promptly, where autos will be provided.

Everybody Welcome

The Women's Institute will hold their monthly meeting on Saturday May 14th. Mr. Lyons of Taber will speak and a good programme will also be rendered.

Mr. R. Simms of Pleasant View was a business visitor to Bow Island on Tuesday last.

The crop conditions in and around Pleasant View are very favourable about two thirds of the seeding is already done and some fields are looking nice and green, the rain has brought the grain through good.

Mrs. Hare of Maleb spent Sunday at the home of Mrs. Brustad.

Mrs. Gibbons was visiting at the home of Mrs. Flemming on Sunday.

Constable Bader was a professional visitor to Purple Springs, Grassy Lake and Burdett on Monday last.

Mr. P. Buehring of Winnifred was a visitor to town on Saturday last.

Mr. C. Jamieson of Medicine Hat was a business visitor here last week.

Mrs. Speirs was a business caller here last week.

Mr. W. Larsen of Grassy Lake was visiting his brother at Winnifred last week.

Mr. Ed Gosselin was a caller here last week.

Constable Rowe of Foremost was a caller to town last week en-route to Medicine Hat returning to Bow Island last Sunday enroute to Foremost.

Mr. and Mrs. Diebart of Windy Ridge were callers to town last week.

Miss Kenny and wife are here from Lethbridge for the purpose of putting in their crop.

Results of School Examinations at Bow Island

As there was a test examination at Easter of Grades VIII, IX, and X, none was held now.

GRADE VII.—Elmer Emerson, Gustaf Carlson, Margaret Allen, Lillian Doran, Eddie Nevers, Alton Ross, Everett Allen, John Rushworth.

GRADE VI.—Rex Werts, Duward Rolfe, Gladys Martin, Donald Blaine, Evelyn Greene, Elizabeth Hart, Roy Reid, Kathryn Gage, Madeline Hanna, Irene Ridgedale, Margaret Egan, Whitney Davidson, Samuel Egan.

GRADE V.—Alice Calder, Gladys Green, Louise Duffy, Harold Whitney, Beatrice Reid, Albert Calder, Veronice Hart, Leora Reams, Lawrence Heirington, Bobbie Hoaglin, D. Doran.

GRADE IV.—Ferne Allen, Martina Heirington, Willie Calder, Henry Maled, Rose Grund, Harry Rolfe, Vera Ridgedale, Philip Ross, Violet Martin, Robert Gage, Leroy Martin, Robert Calder, Leo Ying.

GRADE III.—Greta Ostrum, Sylvia Browning, Dagry Danielson, Kenneth Thompson, Velva Hurst, Inez Brighly, Arthur Doran, Loretta Watterson, Martha Hilsedeiger, Cyril Whitney, Barbara Hilsedeiger, Elvin Wald, Phyllis Egan, Hugh Egan, John Egan, M. Knox.

GRADE II.—Wallace Downing 80%, Margaret Duffy 80%; May Speers 87%, Dorothy Ridgedale 87%; Germain Schille 80%; Edna Keyes 85%; Katharine Hart 85%; Helen Werts 85%; James Rushworth 85%; Michael Brown 90%; Gladys Hanna 83%; Nedra Keyes 83%; Aila Hagen 84%; Bertine Anderson 82%; Patricia Cullen 81%; Dolly Browning 77%; Oral Hanna 74%; Donald McDonald 74%; Edna Reams 73%; Orville Nevers 73%; Clayton West 67%; Sydney Maled 61%;

GRADE I.—James Thompson 90%; Elsie Whitehead 85%; Daniel Camplin 84%; Willie Housley 87%; Daniel Danielson 87%; Adolph Anderson 87%; Laurence Rolfe 79%; Nancy Calder 77%; Maggie McDonald 75%; Walter McKenzie 66%; James McDonald 61%;

GRADE I.—Evelyn Downing, Francis Fisher, Ethel Goldsby, Roland Martin, Curtis Ross, Vera Watterson, Carl Carlson, Ralph West, Clair Hoaglin, Tinnie Allen.

All classes will have Promotion Examinations commencing 24th. May.

D.R. Ware
Principal

7th. May 1921.

Born.—to Mr. and Mrs. J. Ross on the 10th. May, twin boys, one of whom died the same day.

Mr. Andy Cannon and Mr. Lamont, Bank of Hamilton, Taber, paid a visit to Bow Island on Tuesday.

Mrs. Cullen went to Lethbridge on Tuesday.

Mrs. Fred Henderson has moved back to town.

Miss Troyer of Calgary is the guest of Mrs. Fuller.

Mrs. Fuller entertained a few of her friends at the tea hour on Wednesday afternoon.

Mr. C. Ramsey Nash of Swallow is the guest of Mr. and Mrs. H.B. Roach.

Mr. and Mrs. R.H. Robertson left for Lethbridge on Wednesday morning to attend Mr. Pankhurst's lecture.

Mr. Gladman spent the holiday in Lethbridge.

Prevent a Fire

Weeds are a Terrible menace

Prevent a possible Destructive Fire by having all Weeds removed, and proper and careful supervision.

It would be a fine thing if the Town Council made a By-Law which should be rigidly enforced, for the Safety of the Town that every Owner or Occupier of Town Lots or Farms, under their Jurisdiction, be compelled to keep their land free from dangerous rubbish and most of all from Weeds, and not impose on their neighbour to keep it clean for them.

There are back yards right here in Town where a lighted cigarette will

thrown carelessly away might set light to a pile of weeds and the resulting Fire might burn down half the Town.

This is a matter that should bore the Serious and Active attention of all people, especially the City Fathers who have the Town in their care.

Mr. Dalgleish of the Dominion Rubber Co. of Lethbridge called on all business people of the town last Tuesday.

Merchants can get Free Cuts of all kinds of Goods to Advertise in the Review, from the Grain Growers Guide, Winnipeg, these cuts can be had for the asking.

HON AND DEARIE

"How dear to my heart Are the scenes of my Childhood"

THE old home where we spent so many happy days—the games we played with dear old father and mother looking on.
The old home itself, mellowed with time is still as well preserved as it was in our childhood days.
Its preservation is due to the surface protection which only good paint can give.

B-H "ENGLISH" 70% Pure White Lead

Unequalled in covering capacity—no other brand can equal its record for permanence. By using this paint of extreme durability your house is protected for years.

B-H "English" Paint's record for surface saving is the result of its guaranteed formula—70% of its base is Brandram's Genuine B.B. White Lead, the world's standard for almost two hundred years, and 30% pure White Zinc. Paint your family home with B-H "English" Paint and it will remain protected.

LOOKS AS IF HON WILL HAVE TO HANG ON A HOOK

WINNIFRED

Mr. James Robinson received a telegram from Edmonton, informing him to return to all the districts in need of seed and feed, and those who had been refused seed were allowed the necessary amount, which certainly promoted much happiness among farmers, as some were unable to put in a crop this season.

Everybody is seedling with full power, May 5 a grand rain, May 6th, another splendid rain, no drying winds, week ending May 7th, grass has a good start, no cut worms, or grass hoppers reported; sixty per cent of wheat sown and sown.

Mr. Hatfield the "rainmaker" is certainly on the credit side, and is given full praise for the splendid rains of May 5 and 6th, he predicted rain from 1 to 4 days after he had commenced to operate. Winnifred had a magnificent rain and Medicine Hat double the amount during the week ending May 7th.

Mrs. Jas. Larson is visiting in Medicine Hat, the guest of the Misses Tates this week.

Mr. Howard Platt, of Calgary came down renewing old acquaintances and was the guest of Mr. and Mrs. Will Campbell, for a few days.

Mr. T.G. Gaskway and son Robert motored to Medicine Hat Tuesday 10th.

The L.O.O.F. Dance postponed from April 29th, will be given May 26th. Ladies bring cake and sandwiches.

Mr. A.E. Kendall made a business trip to Medicine Hat May 6th.

Mr. and Mrs. M.J. Collins made a business trip to Medicine Hat last week.

Mrs. Joe Fisher moved in her son Darrell's house last week just vacated by Mr. and Mrs. A.N. Wetherell.

Mrs. A.G. Osmond of Red Deer is the guest of Mr. and Mrs. Tom Tiedbale this week.

Mr. Douglas Charter returned from Trail, B.C. where he spent the winter.

Mrs. G. Daly came down from Calgary to spend a few days on their farm.

Mr. Frank Hillis made a trip to Winnifred Monday between trains and is still very much indisposed the trip weakened him and he hastened home.

Last Sunday special Mother's Day Services were held and an excellent program was prepared by the Sunday School children and it brought one of the largest turn outs in Winnifred of parents and children; Rev. Rodgers gave an address on Mothers, the children recited their pieces splendidly and everyone was presented with a flower.

The Old Fellows held their annual services last Sunday May 8th, the L.O.O.F. Hall was crowded and everyone thoroughly enjoyed the splendid service, the musical programme was given by the following ladies and gentlemen were excellent, Mrs. G. Scott Mr. A.C. Larsen Mrs. Teuhler, Mrs. A.F. Hodgson, Mr. W.G. Long, Rev. Rodgers, Mr. A.C. Larsen and Mrs. H. T. Luther was the pianist, Rev. Wm. Rodgers gave a nice address which was appreciated and very appropriate for the L.O.O.F.

Bow Island Continued

This School Report was handed to the Review and is printed exactly as the copy.

The Bow Island School Board have received the Report of Inspector Burkman on the various classes of Bow Island school and its reading at the School Meeting last week was a source of gratification to the Trustees.

The Inspector has words of great praise for all the present teachers of the staff and expresses himself as well satisfied with the condition of the School in general.

To quote from the report might not be to give those interested in the matter all of the official estimate of the teachers.

"Miss Duffy takes a serious interest in her school-work and gives her lessons good daily preparation, she teaches in a bright, cheerful manner, interesting her pupils fairly skilfully and is securing good results from her instructions."

"Miss Knox has an excellent attitude towards her school- duties, shows resourcefulness and initiative in the preparation and presentation of her work, and uses thorough methods. Very good work is being done."

"Miss Dorian has a good grasp of the subject matter of the various grades. She is covering the course in a logical and thorough manner. Satisfactory work is being done."

"Mr. Ware is a sincerely interested and industrious teacher."

Attention was offered as to the attitude of the Pupils in the Senior Grades towards their School-work which must be remedied to secure the desired results. This will require the Active and Serious Cooperation of the Parents to supplement the work of the teacher, if the best progress is to be secured.

Mr. and Mrs. Calder and Mr. and Mrs. Ridgeway were visitors to Medicine Hat last Sunday to see Mrs. Rushworth who is in the hospital there, and took her three little sons to see her, her many friends hope she will soon be able to return home again.

We are sorry to report that Mrs. Ed. Thompson has been on the sick list this week.

George Weller ran into the ditch last Thursday night and claims the ditch is better to run in than the main trail.

Mr. Harold Nordan of Pleasant View was seen in town last Saturday.

Those who begin by trying to deceive others, and by deceiving themselves.

The Weather May 1921

Grain Smut Explosions

(National Crop Improvement Service.)

"In the Pacific Northwest, wheat smut spores live over winter in the soil and the ordinary treatment with formaldehyde is not effective unless there has been a rotation of crops which causes the smut spores to die. As a consequence, dense clouds of smut spores, which may be seen for miles, arise from the threshers and spread wheat contamination over the entire country," says Mr. P. Schlemmer, Perth Amboy Chemical Company.

"Sometimes when this smut cloud is properly mixed with air, a piece of wire or nail will strike a spark in the separator and the result is an explosion worse than a thirteen-inch gun. Blowing machines to pieces and often killing and injuring the crew. The wheat smut tax amounts to millions of dollars. It is in most instances entirely preventable by treatment of the seed, but so serious has it become that the American Department of Agriculture has a separate grade for smutted wheat."

"It will be well for the Canadian farmers to prevent smut from ever getting entrenched while it is comparatively easy."

Safeguarding Inspection

(National Crop Improvement Service.)

"Grain inspection has been reduced to a fine art. In order to avoid dispute, a sample is taken from the car of grain at the terminal market and is divided into two homogeneous halves by means of an ingenious separator into which the sample is poured."

"This divides and mixes the grain so evenly that the two portions may be weighed without the variance of more than a few grains," says Chief Culver, of the Toledo Produce Exchange.

"The object of this is that when the grain arrives at its destination and the buyer should complain of its quality, a re-inspection can always be demanded from the identical sample from which the first inspection was made."

"These reserve portions are kept for several months and in case of dispute, they prove invaluable in settling all complaints as to quality."

"Inspection nowadays is all official and the inspector cannot be tampered with because he has no means whose grain he is inspecting. Grain inspection is as reliable as the compass of sailors."

Notice to our Correspondents and our Readers

"The Bow Island Review" has a "Suggestion Box" and invites sensible and kindly "suggestions" for improving and making the "Review" more interesting to all of its Readers.

Experienced Farmers Say Tractor Proves Inferior To Good Draught Horse

The draught horse cannot be replaced by the tractor on the farm, and the horse is becoming more popular every day as is evidenced by the fact that a large number of the older tractor users are going back to the horse for the major part of their farm power, says G. B. Rothwell, Dominion Animal Husbandman. In the city the larger concerns are going back to the draught horse, using the motor trucks only for light work and for rapid delivery.

"The draught horse has two great centres of activity, the farm and the city. While there is and will be much private experimentation with tractors on the farm, this fact is becoming more and more apparent—when it comes to the question of home-produced, home-repaired, adaptable, fool-proof and last of all economical heavy trucking and transportation power, the relation of the tractor to the horse will be more and more apparent. The fact will take some time in the learning and will be the result of much individually acquired experience. The fact is stubbornly persistent, however, that the older tractor users, who, after all, they had the experience and paid for it, are coming back to the draught horse for the major part of farm power. Both he and his fuel are cheap. His by-product has a steadily appreciating value. When there is a better appreciation of the fact that the quality of the work done on the farm and his condition or ability to get into harness and down to hard work in the spring is one of the greatest factors in farm efficiency, then will be a great stride toward more economical production. If our farms were all fitted with tractors and his condition received as poor care and preparation as do our horses (in general), for spring work, Belgium and France would now be establishing, rather than striving, more economical production. If our farms were all fitted with tractors and his condition received as poor care and preparation as do our horses (in general), for spring work, Belgium and France would now be establishing, rather than striving, more economical production. If our farms were all fitted with tractors and his condition received as poor care and preparation as do our horses (in general), for spring work, Belgium and France would now be establishing, rather than striving, more economical production.

"But the demand for the good draught horse and quality is not alone for farm and country work. It transpires from time to time that the city concerns, having to do with heavy trucking, transportation and haulage generally, return to the horse after thorough trial of the truck. Not on the tremendous scale of the horse in any danger of falling off; not that for rapid delivery over long distances and good roads the horse will give again a competitor in the machine, but these firms have simply been shown that for heavy 'overload' work, from the standpoint of capital economy and adaptability there is a type of horse that will have to take care of a certain part of the city hauling problem. The fact is that the horse that the farmer can grow.

The American Influx

Canada May Depend On Increased Immigration From U.S.
The exodus from Canada, which the late Sir Richard Cartwright was so much given to bemoaning in the days when he was an advocate of commercial union, has been very definitely reversed. Last year 23,500 individuals came in from the United States, bringing with them \$3,335,138 in stock and effects and \$10,487,085 in cash. This is a movement upon a scale which may be compared to the swelling volume; for the attraction of cheap land and promising conditions cannot be said to lure settlement into a country which is steadily approaching the saturation point.—Ottawa Journal.

To Protect Migratory Birds

A bill to amend the migratory birds convention has been given second and third readings in the House. Hon. S. P. Tomin, minister of agriculture, explained that the purpose of the bill was to raise the fine for the destruction of migratory birds of British Columbia, where the provincial law provided for a fine of \$500. Dr. Tomin added that some of the birds which came under the act were worth more than \$100 apiece.

Famous Artesian Well

One of the most famous artesian wells in existence is in the province of the outskirts of Paris, where the water is brought from a depth of 1,798 feet. It yields 516 gallons of water a minute.

W. N. U. 1367

Investigating Cattle Embargo

Whether Abolition Is Advisable.

The arrangements for the official inquiry into the embargo on imported livestock in Great Britain have now been completed. Lord Lindsay will be chairman of the committee and the other members will be Lord Asquith, Sir Algernon Hilly, Sir W. Peel and Sir Arthur Shipley.

As follows: To enquire into the admission into the United Kingdom of livestock other than for immediate slaughter, to ascertain whether abolition of the embargo would cheapen meat and to decide whether it is advisable, having regard to the necessity for protecting livestock already here from disease and restoring their numbers after the losses during the war period.

The commission was decided upon after the embargo on Canadian cattle coming into Great Britain had been an election issue. The Daily Express, Lord Beaverbrook's paper and the Labor party in the election at Dundee, where Mr. Macdonald, Agriculture, Sir Arthur Shipley, Griffith, was defeated by the Laborite when he (the minister) sought re-election. The commission was decided upon after the embargo on Canadian cattle coming into Great Britain had been an election issue. The Daily Express, Lord Beaverbrook's paper and the Labor party in the election at Dundee, where Mr. Macdonald, Agriculture, Sir Arthur Shipley, Griffith, was defeated by the Laborite when he (the minister) sought re-election.

Crop Conditions In Alberta

Farmers Report More Moisture Than For Past Four Years.

Crop conditions in Alberta are very favorable and seedling conditions are fully up to the average, both in the area town and in the forwardness of the season; a resume of the first report this year of the provincial department of agriculture.

Since the opening of spring, seedling conditions are not as early as last year with very few interruptions. In Southern Alberta, conditions are rather better than usual and farmers report that there is more moisture in the ground than there has been in the past four years. It is expected that seedling in the neighborhood of Medicine Hat will be completed by the 15th of May. Fifteen to twenty per cent of the wheat in the Lethbridge area was sown by the end of April, while east of Calgary sixty per cent of the wheat seedling is finished.

In the Red Deer and Lacrosse areas, conditions are not as early as usual due to the extra heavy precipitation, but the Edmonton district is farther ahead than is customary. Wheat has been sown in the area for the past three weeks. In Northern Alberta, the people are hard at work, and in early spring the grass is growing well in the south of the province and livestock throughout has come through the winter in good condition. The feed used in the province is the best.

Will Try Out Gold Claim

Northern B.C. Thought to Be Richer Than Klondike.

Placer gold mining on a large scale than usual is the programme of an Edmonton concern operating in the Klondike district. The company has been given a license to experimental drilling is to be done this summer. The Ingenika Gold Mining Company is about to resume operations on its claim along the Ingenika River and has just sent its first detachment of the season's crew. An expert placer gold driller from California, and an experienced placer panner have been engaged for the season, and negotiations are now pending for the engagement of another mining expert who will come from San Francisco to take charge of the company's operations. A keystone drill now being used in the Klondike will be dismantled and taken to the mine.

The summer's drilling will be for the purpose of it is stated for determining the amount of gold and platinum in the gravels of the Ingenika from the surface to the bed rock. The company has holdings of forty-five miles along the river, beginning about forty miles from its mouth. Some of the richest placer gold has been found in the area, and the surface indications show values of from three cents to \$4.90 per cubic yard of gravel, according to the company's estimates.

Officials of the company state that a thorough try-out of its claims will be made this summer, and believe that they are on the edge of the richest gold find since Klondike days.

Slightly Muzzled

Office men (overheard)—"P—please—sir, can I have tomorrow afternoon off—to go—to—my—grandmother's—fourth match?"—London Opinion.

Assistant to Vice-President

Will Operate Airship

Passenger Lines

First One Will Be From New York to Chicago.

Regular airship passenger lines will soon be in operation between the principal cities of the United States, Lieutenant C. A. Tucker, of the United States naval reserve force, stated recently, in announcing the formation of a \$500,000 airship corporation at Washington. The line will be extended to San Francisco and other lines will follow as new ships are built and put into commission. The present programme calls for five large ships, Lieutenant Tucker said.

A Newspaper's Value

Contains More Interesting Reading Than Average Book of Fiction.

Mr. Robert H. Balfour, of England, has been counting up how many words one gets in a newspaper for a penny, and how many for the same sum in the average novel. He makes his estimate on the basis of the novel. You get only one story in the novel, whereas in the paper you get scores of interesting articles or paragraphs about real events and living men and women. You also get literary articles by well known writers or public men on topical subjects. Moreover, any of the articles and sketches in the newspaper are better written than in any fiction except the best. Mr. Balfour's estimate surprises that people who will give seven and sixpence for a novel will not give a shilling for a newspaper. —From the Christian Science Monitor.

When To Plant Sunflowers

Results About Equal From Seeding On Spring or Fall Plowing.

During the past summer, the department of agriculture of Alberta carried out a series of very interesting experiments as to the manner of seeding sunflowers so as to produce the heaviest yields. In view of the great interest that is being taken in this new stage crop throughout the Canadian prairie provinces and the north-western states, the results obtained will be of great value to numerous dairy and stock men.

It has been found that the difference between seeding on spring and fall plowing was very small—fall plowing having a slight advantage. To get the best results the land, too, should be fairly dry. The experiments showed that highest yields were obtained from land sown about May 31st. For these tests plots were sown at seven-day intervals from May 14th to June 10th, the crops harvested increasing from 20.87 tons to the acre, seeded May 14th, to 35.66 tons per acre, seeded June 10th, the increase in 31.99 tons to the acre on June 10th.

The heaviest yields were obtained when drilled in rows thirty inches apart. In districts, however, where the rainfall is not so heavy during the growing season, it might be advisable to have the rows slightly farther apart. The plants should be thinned out with a hoe from four to eight inches apart.

Several Kinds Of Shorthorns

Some Pedigrees Do Not Trace To Imported Stock.

A straight Scotch herd Shorthorn has been traced through both the sire and the dam to cattle bred in Scotland, and their descendants produced in this country without the admixture of any other blood.

Scotch-topped Shorthorns are the produce of Scotch bulls and cows of other blood lines. There are several kinds of Shorthorns which might come under the breeder's term of "Ordinary Shorthorn." Shortfaced cattle descending from cattle of the earlier importations to this country would probably come under this heading because they are now considered plain bred, that is, in comparison to the Scotch cattle. Then there are some Shorthorn cattle whose pedigrees do not trace to imported stock.

The most recent improvement of wireless telegraphy makes it possible for an operator to read 50 to 100 words a minute.

Future Canadian Farming Will Depend Largely On Raising Of Live Stock

Will Operate Airship Passenger Lines

First One Will Be From New York to Chicago.

Regular airship passenger lines will soon be in operation between the principal cities of the United States, Lieutenant C. A. Tucker, of the United States naval reserve force, stated recently, in announcing the formation of a \$500,000 airship corporation at Washington. The line will be extended to San Francisco and other lines will follow as new ships are built and put into commission. The present programme calls for five large ships, Lieutenant Tucker said.

The plants should be thinned out with a hoe from four to eight inches apart.

Several Kinds Of Shorthorns

Some Pedigrees Do Not Trace To Imported Stock.

A straight Scotch herd Shorthorn has been traced through both the sire and the dam to cattle bred in Scotland, and their descendants produced in this country without the admixture of any other blood.

Scotch-topped Shorthorns are the produce of Scotch bulls and cows of other blood lines. There are several kinds of Shorthorns which might come under the breeder's term of "Ordinary Shorthorn." Shortfaced cattle descending from cattle of the earlier importations to this country would probably come under this heading because they are now considered plain bred, that is, in comparison to the Scotch cattle. Then there are some Shorthorn cattle whose pedigrees do not trace to imported stock.

The most recent improvement of wireless telegraphy makes it possible for an operator to read 50 to 100 words a minute.

Will Operate Airship Passenger Lines

First One Will Be From New York to Chicago.

Regular airship passenger lines will soon be in operation between the principal cities of the United States, Lieutenant C. A. Tucker, of the United States naval reserve force, stated recently, in announcing the formation of a \$500,000 airship corporation at Washington. The line will be extended to San Francisco and other lines will follow as new ships are built and put into commission. The present programme calls for five large ships, Lieutenant Tucker said.

A Newspaper's Value

Contains More Interesting Reading Than Average Book of Fiction.

Mr. Robert H. Balfour, of England, has been counting up how many words one gets in a newspaper for a penny, and how many for the same sum in the average novel. He makes his estimate on the basis of the novel. You get only one story in the novel, whereas in the paper you get scores of interesting articles or paragraphs about real events and living men and women. You also get literary articles by well known writers or public men on topical subjects. Moreover, any of the articles and sketches in the newspaper are better written than in any fiction except the best. Mr. Balfour's estimate surprises that people who will give seven and sixpence for a novel will not give a shilling for a newspaper. —From the Christian Science Monitor.

When To Plant Sunflowers

Results About Equal From Seeding On Spring or Fall Plowing.

During the past summer, the department of agriculture of Alberta carried out a series of very interesting experiments as to the manner of seeding sunflowers so as to produce the heaviest yields. In view of the great interest that is being taken in this new stage crop throughout the Canadian prairie provinces and the north-western states, the results obtained will be of great value to numerous dairy and stock men.

It has been found that the difference between seeding on spring and fall plowing was very small—fall plowing having a slight advantage. To get the best results the land, too, should be fairly dry. The experiments showed that highest yields were obtained from land sown about May 31st. For these tests plots were sown at seven-day intervals from May 14th to June 10th, the crops harvested increasing from 20.87 tons to the acre, seeded May 14th, to 35.66 tons per acre, seeded June 10th, the increase in 31.99 tons to the acre on June 10th.

The heaviest yields were obtained when drilled in rows thirty inches apart. In districts, however, where the rainfall is not so heavy during the growing season, it might be advisable to have the rows slightly farther apart. The plants should be thinned out with a hoe from four to eight inches apart.

A POISON STOREHOUSE IN EVERY HOME

You may not think so, but that's what the doctors are after. The kidneys are the filters that remove from the blood the waste matter that acts like deadly poison on the vitality and health of the system. Dr. Hamilton's Pills actually break up and expel fermenting matter from the bowels, restore the liver and stimulate all accessory organs. No medicine will clean up the system, tone up the blood, make you feel fit and fine as quickly as Dr. Hamilton's Pills. Use them and needed in every home. Hamilton's Pills of Montreal and Battersea, 25c dealers. The Caltrop-rose Co., Montreal.

THE TEST

By E. L.

Written Exclusively For This Paper

When Mary returned from boarding school to the little town where her mother lived in the little country town about sixty miles from a large city, she was just sixteen, vivid, strong and beautiful.

Her mother, who had struggled through the years in a vain battle with poverty looked her over approvingly, appraising her youth, bloom and vigor as so many sons in the marriage market.

It was to this end that Mrs. Valentine cultivated the acquaintance of James Holcomb, a blue man of the world with keen, humorous, discerning eyes, but with a heart which was as cold as the steel of his eyes.

And so trying to call back the youth which age in an unprofitable life, always regretted, James Holcomb, attracted by Mary's fresh bloom and beauty audaciously courted her. And as he showered his attentions upon her and plied her mother with love letters, Mrs. Valentine smiled approvingly.

"Thank God," she thought, "Mary shall never know the meaning of grinding poverty, and perhaps it will come to an end for me."

But Mary had already given her heart. Since she was a tiny, white frocked little she had been friends with Tom Daly who had grown into a tall, outstanding six foot young man of twenty-three. Tom was a market gardener. To see the two samplers down the Main Street of the little town on a warm summer afternoon, the sweet and fresh and lovely and upright, well-made and vigorous was a sight upon which the Gods might smile. And so it was that the white fire of the glance which he sometimes bent upon her knew that he offered her the most acceptable and beautiful thing in the world, the first love of his young manhood.

But she was poor and Mrs. Valentine had her ways to put him out of her life. She was only a girl, and her heart could not be touched by the devotion of a clever man of the world like Holcomb who knew so well how to handle the heart of a woman. Then as her mother told her sordid story of the struggle she had had with poverty and of the long dread it had been to her, Mary would follow the same path, the girl said Tom Daly on a soft, September evening as the stars twinkled wistfully down on them, half obscured by the clouds that they must part. She would give no reason and Tom was young and impetuous. He did not know that her heart was breaking, as he strode away with youth's impetuous, angry, sore and broken.

In a few weeks Mary's engagement to Holcomb, the millionaire, was torn.

"Have you seen her ring?" the townfolk asked each other. "It was a wonderful stone they all said; came from Egypt and was in a strange setting. They were going away to live in the big city, a grand match for a poor girl. Of course he was a little old for her, but then he was such a smart man and so well to do."

"Better be an old man's darling, etc." croaked an old dame and all her cronies nodded assent. "But she had then read the heart of"

Mary, there would have been a different story. For Mary's heart was not in the approaching wedding; it was over at the little cottage where Tom was. Tom said no word, but he had changed. His shoulders drooped a little now and his face often had a grey look heretofore quite foreign to him, and in his eyes instead of the white light of his first devotion, there shone a reckless glare.

Mrs. Valentine, Mary and Holcomb were to spend a brilliant winter season in the city, during which time Mary was to be introduced to society and then her marriage was to take place in the spring.

It was after a marvelous ball one evening that Mary came to a realization of her fate. Holcomb was the one who had been the first to look at her. He had looked at her and kissed her on the cheek. She recoiled and shivered from head to foot, and as they drove home she felt her heart torn. She talked to her very silent. For the rest of the night she tossed sleeplessly on her little bed and in the morning, wide-eyed and wakied she made her resolve.

New regarding Mary had not failed to come from the city to the little town, and her triumph and beauty were common town talk. Only Tom Daly did not discuss the matter; only he remained silent when the others chattered. Some of them knew of his wound and some were sorry, but the general opinion seemed to be that he had spoiled too many girls. Mary could never have been happy with him, but in the stubborn pride of his mind he would not have made her happier than she could ever be with her elderly suitor. But he would make no move, nor say one word to develop the matter. He was poor and Mary wanted riches. If she had only been willing to wait, but no, she didn't and he felt that his life was wrecked.

That evening he sat smoking quietly before his little open fireplace. The stars were falling outside and everything was quiet and still. He often sat like this of late until the dawn, conjuring up pictures of Mary who he loved her and loved her, Mary as he heard of her in her triumph in the great city, and most deplorable thought of all, Mary as that other man's wife. To outsiders he was stern and non-committal, almost unsocial so for such a young man, but sorrow is a great teacher. Now, however, he laid his pipe on the table and let his head sink into his hands.

It was thus that Mary saw him as he came up the garden path and looked in at the lattice window. When she saw him she opened the door and rushed in crying. "I can't do it, I can't do it, I can't do it. If it gave me so much misery for a few months just to be engaged to suddenly come to me what a relief it would be. I don't want to be a heart-breaking thing it would be to me. I can't. Mother is at home now. I can't wait until morning though. I had to come to you tonight."

And for the first time Tom held his heart's desire in his arms, and the light that shone from his eyes and his face shone on both of their faces.

And so instead of a wedding in the big city, Mary and Tom were very quietly married at the parsonage.

They would be very poor very poor and he could not help a pang as he realized how much Mary had given up for him, but he determined that never had man worked as he would work to make it up to her. Then they both received a great surprise in the shape of a letter from James Holcomb containing a gift of \$100,000.00 as a wedding present and asking Mary to come to Europe for a year at least because she knew that Tom had dreamt of her as being the Queen of that little spot.

And bound for a beautiful island in the summer seas on a white decked steamer, James Holcomb sat alone with his memories, not of Mary alone, but of a first love thirty years before.

King Gives Coal to Help Poor.
The King's solicitude for the poor people of Windsor, who are in difficulties owing to the shortage of coal, was demonstrated when the mayor of Windsor received a telegram stating the King had authorized the transfer of 25 tons of coal from the stocks of Windsor Castle to the coal merchants of the town for household use.

Why doesn't some genius crown himself with glory by discovering a process for extracting gold and silver from mining shales?

"Your Teeth"

By Rex Proctor McGee, M.D., D.D.S., Editor of Oral Hygiene.

Copyright, 1921, by Rex Proctor McGee.

HABIT

Habit is simply cultivated instinct. It is just as easy to cultivate good habits as it is to cultivate bad ones if you start right. The habit of cleanliness is one that stays with you, because it is comfortable and gives a feeling of respectability.

Every child that has been taught to take care of its wonderful little body to wash hands and face and teeth and take baths and to know the happiness of clean clothes, will carry that habit through life.

The personal habits that are formed in our first twelve years are the ones that mould our personality. That is one of the reasons for beginning good habits early, particularly with the teeth. Children's mouths should be examined every three to six months. All cavities should be filled and every stain should be removed.

If temporary teeth are allowed to decay, decay will pass in to the permanent teeth and make the gums sore.

Then the food will be chewed upon one side of the mouth until the other side becomes unused and the poor little fellow tries to mince their food with their front teeth. It is impossible for anyone to develop good habits, to chew his food properly with his front teeth alone.

If the food is not well chewed and mixed with saliva, digestion is very difficult. A great deal of energy is used in trying to digest food that is sent to the stomach in chunks.

Nature tries to develop good habits into a healthy adult. Every ounce of food that goes into a child's stomach should be converted into energy, but instead of making energy, unchewed food only makes more work.

Aside from all of the pain and poison from pus and the long list of diseases that follow decay and abscessed teeth, good digestion would be worth every effort that we could make to keep our mouths healthy.

Children with good teeth will grow up into men and women with good teeth because the good tooth habit grows. They do ever know the happy person with a poor digestion?

Rotting Alive

In Russian Camps

The Gentle Methods Adopted by the Bolsheviks

According to an appeal for aid sent out secretly from Moscow, a hundred thousand Russian citizens are rotting in the concentration camps of Russia. The greater number are women and children, and their life is described as continual torture and suffering. They are kept at bayonet point the end of the civil war.

There is reason to believe that the statement is not exaggerated. A Canadian officer, who had seen a good deal of life in Russia in recent times, said recently that conditions are appalling. The conditions of the educated classes is especially deplorable. Even when they are not deliberately tortured, they are the victims of frightful suffering.

The most heinous of the educated classes is especially deplorable. Even when they are not deliberately tortured, they are the victims of frightful suffering. There is a good deal of deliberate torture. This Canadian informant spoke of one case that had come under his own notice. A young girl, the daughter of an old Russian nobleman, was fastened to a table by a nail driven into each of her wrists. The nail and paper were given her that she might reveal the hiding place of her father. To further encourage her she was begged. When she refused to say she was in a most pitiable condition, without a tongue, and unable to eat or speak.

His First Shoes at 74.
J. T. Cartman, of Sudas, N.Y., although seventy-four, has just bought his first pair of shoes. He has worn boots all his life, and still wants to, but search as he may, he can find none for sale in any of the neighboring cities.

Your Red Cross Calls

Red Cross to-day is the vision of a wonderful ideal. Faith and effort can carry it to a glorious reality.

Its peace-time mission is to save lives and to help the suffering, exactly as it was on the battlefield.

It can ward off disease from your child and mine and the child that is yet unborn and make the world a better place for him to live in. It can ward off pestilence and contagion from your community and so protect us all. It can help weld all the people of our country and of all the other countries into the common brotherhood of sympathy that is so necessary now if humanity is to keep to the path of progress.

Red Cross has not forgotten the crippled, the blinded, the helpless, or the simply unsettled remnants of war, in our hospitals and throughout our land.

She remembers them, and has the resources and devotion to care for them, but she also has a new and a broad work to do for which your endorsement is now asked.

The membership enrolment is a nation-wide reminder to everyone who has ever helped the Red Cross, or been helped by it—and who has not—to renew their allegiance to its sacred emblem, identify themselves by their membership with its effort to better the condition of humanity at home, throughout our Dominion, all over the world.

When you could see with your own eyes that your son was in danger and could be helped, you did not hesitate. You can still see the dangers that surround him everywhere, if you will but look with the eyes of understanding.

Learn all about the Red Cross Mission for health. Join the Red Cross and enlist in its crusade.

UNIVERSAL

MEMBERSHIP ENROLMENT

WESTERN CANADA DATES, JUNE 4-11

This is also a call to every man, woman and child who can and will, to give their service to the organization, to assist in the work of personality, extending to every individual the opportunity and privilege of this membership.

Lloyd George's Chief Secretary

Possesses Wonderful Memory and is Remarkable Person.

J. T. Davies, the British prime minister's principal secretary, is a remarkable person. He possesses a wonderful memory, and is never at a loss for a fact or document. His room is next to the cabinet room, and it is a mystery how he gets through the enormous amount of correspondence with which he has to deal. He is continually invaded by visitors, calling to ask questions, or awaiting their turn to interview Mr. Lloyd George or the cabinet. In addition to this, Mr. Davies usually has to deal with about 100 telephone calls a day. Any ordinary man would be driven mad. He is a popular and well-known figure in political and diplomatic circles.

"Say It With Flowers"

This Gives the Sky Men a Chance Says Minister of Agriculture.

Barbful young men owe a debt of gratitude to the horticulturist, judging from the address of Dr. S. F. Wolcott, Federal Minister of Agriculture, at a recent banquet of horticulturists at Ottawa. The minister of agriculture said: "The horticulturist, in addition to refining influences which they have effected, have given to the barbful young man an opportunity to approach his lady love with greater safety and assurance than he could in olden days, because, under present conditions instead of having to go through the usual platform that was adopted by our forefathers, he can 'say it with flowers'."

Want Right to Select Husbands.

The rapid strides which Japan is making toward adoption of Western dress and dress expression in agriculture to let women have more to say about the selection of husbands. Such matters are almost entirely in the hands of parents, who select husbands for their daughters, who obediently marry whomever they pick out. A recent article in a prominent Japanese magazine states that while men never find any difficulty in getting mates, women must have money and training of one kind or another before they can find husbands.

Canada's Western Banks Better Than American

Extensive Inquiry Shows They Give Better Service.

The announcement of new legislation in Manitoba to advance the interest rate on loans under the Rural Credits Act from 6 to 7 per cent may be taken as an indication that it is being realized that the financial of public loans, at rates below those prevailing in the money markets under the magic government control, are being exploded. In Saskatchewan the realities of the situation have been appreciated by Hon. C. J. Dunning and in Alberta the Hon. Mr. Mitchell has advised against following the Manitoba example. British Columbia, likewise, shows little disposition to go ahead with the provincial bank idea.

That there is a growing desire to bring about a better public understanding that farm credits are based on business principles, is indicated in an article by C. W. Peterson, directing editor of the Farm and Ranch Review, Calgary, in which the point is made that the banks, through their branch managers, have been giving better service in Western Canada than has been the case with the banks in the south of the border; this statement is made after a somewhat extensive inquiry into the banking situation on both sides of the line.

Japanese Business Women.

In Japan there are a large number of women who, as heads of business houses, employ many men and women and pay a large amount of the taxes, but suffer from the same conditions as men just because they are women.

FREEZONE

Corns Lift Off with Fingers

Drop a little "Freezone" on an itching corn, instantly that corn stops cost you cents. Drag it off with your fingers. It doesn't hurt!

Your druggist tells a bottle of "Freezone" for a few cents, sufficient to remove the most stubborn corns or corn between the toes, the calluses, without a particle of pain.

Soviet Buys More Locomotives

German Firms Have Accepted Order For 500.

The Russian Soviet Government has placed an order for 500 locomotives with German manufacturers. This is the second order from Russia for locomotives. The previous order was for 100 locomotives, and practically has been filled, having been paid for in advance. Payment on the present order has not been made in advance, however, and the Russian method of payment is yet to be negotiated, but the order has been accepted by the German manufacturers. Four firms—the Krupp, Borg, Hartmann and Lohr—are members of a pool which has signed contracts to deliver the locomotives.

A New Bee In England.

A strange new bee, pitch black and of large proportions, has been found in Hertfordshire. Both the insect and the nest are curious, and have never been found in England before.

ECZEMA

You are not the only one who suffers from Eczema. It is a skin disease that affects many people. It is caused by a variety of factors, including poor circulation, poor diet, and poor hygiene. It can be treated with a variety of methods, including topical treatments, systemic treatments, and surgery.

ASPIRIN

"Bayer" is only Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting Bayer Aspirin at all. It is a trademark of Bayer.

Aspirin is a powerful pain reliever and fever reducer. It is also used to treat a variety of other conditions, including rheumatism, arthritis, and heart disease.

Handy tin boxes of twelve tablets each for cents. Druggists also sell larger packages. Made in Canada.

Aspirin is the trade name for acetylsalicylic acid, the Bayer trademark.

Monocarbonylchloride of Salicylic acid.

Post Office Department Regulation

It is not the wish of the Post Office Department that local Post Office mail should become an advertising bureau. Certain Departmental Notices are to be posted thereon but it is a recognised fact by the Department that "advertising" distinctly belongs to the publisher's field, and local postmasters will be saved the unpleasantness of a refusal if the public kindly keep this fact in mind.

STEP ON THE GAS

When you are driving a car along the road and come to an upgrade, what do you do—slow down the engine and start off the power?

Not much!
Without stopping to argue or consider the point, you just reach over and step on the accelerator—speed her up, and slide up and over the hill without a hitch.

Just the natural thing to do, isn't it?

Then why don't you do the same in your business—that upgrade of dull trade you see ahead can be overcome by feeding your business a little more real live advertising—speeding up your selling power. Look it; you'll have the pleasure of trying back from the top of the hill and waving to the fellows who are taking your dust.

Step on the Advertising Accelerator.

Fleet-Footed Jerry to run in Big Classic

City Star Athlete will Compete with World's Best at Philadelphia June 4th.

Jerry Dumas, Jacksonville's wonder track man, and able representative of the American Legion in its athletic events will represent the local post of the Legion in an international track meet to be staged on Franklin Field, Philadelphia, according to an announcement of Captain Harvey Payne, local commander last night.

Jerry finished "high man" in the city-wide track meet held at Confederate park last Saturday afternoon, when he met a field of strong contenders and covered himself with glory by winning or placing in nearly every event.

Insofar as Great Britain, France and America will be strongly represented at the Philadelphia meet, it becomes a most important classic and can be compared with the famous Olympic meets.

The allied ambassadors in Washington are using their influence to get their countries to send strong teams over so as to make things rather hard for the American contenders, the events of which must be open for the army, navy and marine corps will attract international interest.

Dumas is a wonder at the 100 yard, broad and high jumping, and also a wizard at pole vaulting and with this kind of "ace" representing the local post, it is reasonably certain that Jacksonville and the local Legion post will be before the eyes of the nation.

One of the most important events of the meet will be the international relay race in which every country represented in the meet will enter a team.

Just what events will be open to the Legionnaires at the meet are unknown at this time, but Commander Franklin D'Olier will soon notify all Legion posts, so that they may make plans for sending representatives.

Jerry Dumas with his fleet-footedness in meets while serving with the U.S. Colors during the world war caused the start to be considered in a selection of several hundred athletes to appear before King George in a track meet in which the Canadian Calvary Brigade carried off high honors.

Dumas entered the 100 yard dash on August 14, 1917 before King George and out of a field of eighty entries he came through at the "hedge" position, making his mark at 14.04 seconds.

The Legion star has made the 100 yard mark in the 100 yard dash and expects to better this mark at Philadelphia, thereby leaving for the whole field something to shoot at.

Yank Out the Stumps

(National Crop Improvement Service.)

"Our tillable lands have gone and with a further growth and development of the world, we must utilize every waste acre. Stump pulling is a vital problem to the man who is farming in a cut-over country, to the man who is paying taxes on idle stump land and to the man who is seeking a rich farm at a comparatively low price.

The natural, quickest and most economical way of clearing out stumps and roots, is with a stump puller and wire rope. Says Mr. R. B. Rider, president, Canadian Steel & Wire Co.

"The use of a pulley block so designed that any number of them can be used to double, triple or quadruple the power of the machine, will conquer the most stubborn stump without fail.

"When dynamite is used, the roots are left to be grubbed out or pulled out by team, all of which is slow, hard work. With this stump puller and wire rope, the job is clean and complete.

"A good stump puller will pay for itself in the saving of hand labor on a few acres of ground, to say nothing of the increase of crop values. You can use it in the wet seasons when you can work at nothing else. In fact, the machine works under when the ground is wet.

"We need every acre."

Judging from our Continued Rush of Business, the People appreciate Real Values and Prompt and Efficient Service.

Timely rains, tho' long delayed,
Are here in old-time style.
On every face is now displayed
A broad and pleasant smile.

Though oft' despondent in the past,
Bright hope again holds sway;
If refreshing rains will only last
The farms again will pay.

When rain descends upon the earth,
Old Nature responds in glee.
To every seed and plant gives birth,
And from bondage they're set free.

A fine stock of the Very Latest Styles in Ladies' Hats will be on display in Our Store on Saturday, Monday and part of next week.

BURDETT MERCANTILE STORE

A. H. RYGG, PROP.

DEAR LITTLE CHILDREN

The politician rushed into the editorial sanctum.

"What do you mean?" he roared.

"What do mean by insulting me as you did in last night's 'Clamor'?"

"Just a moment," replied the editor.

"Didn't the story appear as you gave it to me—namely, that you had resigned as city treasurer?"

"It did. But you put it under 'Public Improvements.'"

"Men listen when money talks. Probably that is why we sometimes hear of hush money."

"Tell me why?"

"Tis because their hearts have play in their bosoms every day.

Free from sin and sorrow's way—

Therefore 'tis they laugh so gay."

Grassy Lake

The government grading outfit are very busy improving the roads between Grassy Lake and Purple Springs.

Mr. J. J. Mills and family have recently moved out to their farm South East of Grassy Lake.

Mr. Caruthers was a business visitor to Grassy Lake on Monday last.

Mr. Chas. Scott is reported to be very much better.

D. L. MORROW SMOTHERED IN BARLEY AVALANCHE

D.L. Morrow, who recently met a horrible death in Castor when his foot caught in the hopper of the Alberta-Pacific elevator and being unable to extricate himself smothered when an avalanche of barley came down on him, he is well known in the Blackie, Claresholm and Macleod districts, having lived there for many years.

The funeral of the unfortunate man was held at Claresholm from the Methodist church. He leaves a wife and the following children to mourn his loss: Lendrum 19, Elita 16, Harold 13.

Helma 11, Verma 5, and Midge 2.
Mrs. C.L. Hatch, of Raymond, is a sister of the deceased.

Mr. Morrow came to Alberta from Wyoming in 1903 settling in the Claresholm district. He acquired a ranch west of that town. He worked at Blackie for some seven years as manager of the Farmers Cooperative Elevator. Last August he accepted the management of the Alberta Pacific elevator at Castor and resided there until his tragic death.

By a peculiar coincidence the man who took Mr. Morrow's place at the elevator the morning of the latter's death fell the same day from the top floor catching in the cribbing and

leaving his leg in three places. He is now in a critical condition in a Calgary hospital.

COAT OF ARMS OF PROVINCES OF CANADA

Burdett News

From our own Correspondent

It is rumored that Burdett Hotel is changing hands, Mr. Brown is leaving for B.C. and Mr. Morrison will be the new tenant.

The Burdett Board of Trade met in the Council Chamber last week. There was a very large attendance, proof of the interest the members have in this organization. President A. H. Rygg gave a brief outline of the accomplishments of the board in the past year.

Mr. C.T. McKinnon reported on the board's financial standing.

One of the matters of general interest to the village and district that was brought before the board was the question of a hospital. After several suggestions were put forward it was decided to place this matter in the hands of a committee. The following members were selected: A. Hamilton G.H. Johnston, K. Brown and J.H. Robinson.

The election of officers for the ensuing year resulted in Mr. A.H. Rygg being again elected President, Mr. W.W. Andrews as Vice President and Mr. C.T. McKinnon as Secretary-Treasurer. The Board of Trade has met considerable success in the past year, and it is hoped still continue to make its influence for good felt in the interest for Burdett and district.

NOTICE

There will be a dance given Tuesday evening May 17th, in the Majestic Theatre under the auspices of the Burdett Baseball Club. The music will be the best and a good time is assured all. "Come and give Baseball a Boost"

A meeting which was well attended in the interest of Base Ball, was held in the Town Hall Burdett, Saturday evening May 7th, when the club officers for 1921 season elected.

The result of the meeting in this respect was that three of our best sportsmen will have charge of the Base Ball affairs this season, E. L. Barnes as manager, G.W. Henderson as Secretary-Treasurer, and F. M. Bishop, captain of the team.

With such men as these at the head of the club we can expect to see good results this season.

All of the fans present at this meeting evidenced the greatest enthusiasm and if the same spirit is carried throughout the season it will not be left to the officers alone, to maintain Burdett's reputation, in this peer of all games, Base Ball.

Purple Springs

Mr. Binkley of Manotoba is helping Mr. E. Long through the busy time.

Mr. Cris Long and some friends visited with his parents on Sunday.

Mrs. A. Edwards must be the first on the list this year in gardening as everything is up and looking fine.

The farmers are wearing a broad smile these days and say that this is an ideal spring, big prospects are in view.

A few fields of wheat in the Burdett district are up and looking well.

Everything is up this week at Grassy Lake (news is short) but says they saw had a splendid fall of rain last week.
